

| Planet  | Mass (Earth masses) | Semimajor Axis (AU) | $\lambda$ (kg/m)         |
|---------|---------------------|---------------------|--------------------------|
| Venus   | 0.815               | 0.723262            | $7.15954 \times 10^{12}$ |
| Earth   | 1.                  | 1.                  | $6.35364 \times 10^{12}$ |
| Mars    | 0.107               | 1.524               | $4.46266 \times 10^{11}$ |
| Jupiter | 317.8               | 5.203               | $3.88116 \times 10^{14}$ |
| Saturn  | 95.16               | 9.537               | $6.33848 \times 10^{13}$ |
